Greetings from The Park.

Please find below a small brief and a link for images as the **The Park New Delhi initiative on Hand Hygiene Hand**

The Park New Delhi celebrated the Hand Hygiene Day on 5th May,2015 keeping in mind the HAI vision .The Park took steps to create public awareness among the local community through students from school and employees of the hotel and the people who handle food, about the importance of washing hands with soap and water as the simplest and most cost effective way of promoting community well-being through prevention of respiratory illnesses, common cold, influenza and other infections.

The Team at The Park New Delhi visited P&T Sr. Secondary School and spread the message "Washing Hands with soap saves lives". The highlights of this great initiative are as follows:

1. The Park created an environment in the Hotel conducive to the Hand Hygiene Day's significance with displays and posters.
2. The Park arranged an interesting and easy demonstration of hand washing for over 75 students and teachers.
3. The Park put together videos to add fun to learning about hand hygiene at home, work, hotel premises and kitchens.
5. The Park organized a painting and quiz competition for the students.
6. Exciting goodie bags and T-Shirts were distributed to the students for them to take the experience home.

It was very heartwarming to receive such a delightful response from the students and the teachers. This is the way forward for a 'Healthy Hotel' through always supporting and promoting a healthy environment for this and future generations.

Three cheers to the Team at The Park New Delhi.
