

CELEBRATION OF 20TH HAI WORLD ENVIRONMENT DAY THE UMMED, AHMEDABAD

On the occasion of the "World Environment Day-Prajabaran Divas" 5th June ,The Ummmed Ahmedabad team celebrated with community awareness & education ,feel good factor to all the in-house guest by gifting seeds, offering seeds with an awareness note to all walk-in guests at the restaurants .

The day started at 7.30 in the morning when all the hotel employees gathered at the main porch & walked to airport circle with a "Environment Awareness" poster.

The people passing by on the street in front of the hotel were offered plants with the compliments of the hotel.

A Small pouch containing seeds were kept in all rooms along with a letter of awareness & initiative of the Ummmed Group.

Later in the day, a plantation drive was organised at adjoining lawn of the hotel.

THE IMPERIAL SPREADS THE MESSAGE OF A GREENER EARTH THIS WORLD ENVIRONMENT DAY ~ GREEN INITIATIVES TAKE PRIORITY IN THE HOTEL OPERATIONS ~

5TH June 2017: The Imperial New Delhi supported the theme for World Environment Day 2017 of 'Connecting People to Nature' as promoted by Hotel Association of India (HAI). This year's theme invites us to think about how we are part of nature and how intimately we depend on it. It challenges us to find fun and exciting ways to experience and cherish this vital relationship.

To make the associates and guests abreast about the importance of **protecting the planet Earth**, the hotel took the following initiatives for celebrating the occasion:

- *Displayed responsive posters in guest and employee areas to promote the message of 'CONNECTING PEOPLE TO NATURE- IN THE CITY AND ON THE LAND, FROM THE POLES TO THE EQUATOR'*
- *Organized a poster making and slogan writing competition for employees to highlight the key message: **Connect People to Nature***
- ***Distributed 200 planters amongst guests** with the message "Reconnect with Nature as you create your own green patch with this planter. Celebrate World Environment Day with us"*
- *A poster in the lobby highlighting the Efforts on Sustainability*
- *A flower art installation was designed in sync with the theme of **Connecting People to Nature**.*

Mr. Vijay Wanchoo Sr. Executive VP and Executive GM The Imperial New Delhi expressed his views on the occasion "The Imperial New Delhi takes pride in joining hands with HAI, again this year to raise global awareness about the significance of a healthy environment and to solve various environmental issues by implementing some actions to protect nature and Earth, leading to a positive and healthy environment for all. We have always demonstrated a commitment to environment conservation, whilst providing our guests with experiences which will enhance the awareness and understanding of the environment like installation of solar panels for heating water in guest rooms, use of Roti maker in staff cafeteria and launch of Organic waste

composter. All these have helped in saving energy, reducing carbon emission of coal and has led to an organized waste management system.”

He further said “ This year in 2017 we have gone a step further in spreading the message of *Connecting with Nature* by distributing **200 planters amongst guests** and generating awareness through a ***flower art installation at the lobby***, all for the occasion. The Imperial key initiatives and significant efforts have been modeled to encourage healthy tourism and eco balance.”

GREEN INITIATIVES AT THE IMPERIAL

- TOTAL PREVENTIVE MAINTENANCE
- IMPLEMENTATION OF ENERGY CONSERVATION TECHNIQUES

CELEBRATION OF 20th HAI WORLD ENVIRONMENT DAY 5TH JUNE 2017
JAYPEE VASANT CONTINENTAL, NEW DELHI

'Connecting People to Nature', the theme for World Environment Day 2017, implores us to get outdoors and into nature, to appreciate its beauty and its importance, and to take forward the call to protect the Earth that we share.

World Environment Day is the biggest annual event for positive environmental action and takes place every 5 June. This year's host country Canada got to choose the theme and will be at the centre of celebrations around the planet.

We at Jaypee Vasant Continental celebrated the Green Day this year with the thought - how we are part of nature and how intimately we depend on it.

"You must be the change you wish to see in the world!!!" Go Green!!

NAMASKAR !

The Suryaa , New Delhi Celebrated 20th Annual HAI environment day on 5th June 2017 under the theme “ Connecting People to Nature ”

Following activities took place to enhance this day:

- Motivational green films were screened for employees in Annapoorna.
- Educated the staff to how to save environment.
- Staff took green pledge to grow more and more plants by writing slogans on bulletin board.
- Staff adopted one green plant to take care of it all through. On each plant it was written I own you.
- Rangoli was formed in lobby. It reflected two faces of earth one smiling with green trees and second crying with dry trees.
- All around green environment was created with green posters enlightening the incoming guests as well as staff to plant more and more trees.
- A special E- Bulletin was launched educating the staff to how to save environment.

THE SURYAA E- BULLETIN

100 Ways you can improve the environment

In your home—conserve energy

1. Clean or replace air filters on your air conditioning unit at least once a month.
2. If you have central air conditioning, do not close vents in unused rooms.
3. Lower the thermostat on your water heater to 120°.
4. Wrap your water heater in an insulated blanket.
5. Turn down or shut off your water heater when you will be away for extended periods.
6. Turn off unneeded lights even when leaving a room for a short time.
7. Set your refrigerator temperature at 36° to 38° and your freezer at 0° to 5°.
8. When using an oven, minimize door opening while it is in use; it reduces oven temperature by 25° to 30° every time you open the door.
9. Clean the lint filter in your dryer after every load so that it uses less energy.
10. Unplug seldom used appliances.
11. Use a microwave whenever you can instead of a conventional oven or stove.
12. Wash clothes with warm or cold water instead of hot.
13. Reverse your indoor ceiling fans for summer and winter operations as recommended.
14. Turn off lights, computers and other appliances when not in use.
15. Purchase appliances and office equip-

- ment with the Energy Star label; old refrigerators, for example, use up to 50% more electricity than newer models.
16. Only use electric appliances when you need them.
17. Use compact fluorescent light bulbs to save money and energy.
18. Keep your thermostat at 68° in winter and 78° in summer.
19. Keep your thermostat higher in summer and lower in winter when you are away from home.
20. Insulate your home as best as you can.
21. Install weather stripping around all doors and windows.
22. Shut off electrical equipment in the evening when you leave work.
23. Plant trees to shade your home.
24. Shade outside air conditioning units by trees or other means.
25. Replace old windows with energy efficient ones.
26. Use cold water instead of warm or hot water when possible.
27. Connect your outdoor lights to a timer.
28. Buy green electricity - electricity produced by low- or even zero-pollution facilities (XC Greenpower for North Carolina - www.greenpower.com).

In your home—reduce toxicity

29. Eliminate mercury from your home by purchasing items without mercury, and dispose of items containing mercury at an appropriate drop-off facil-

- ity when necessary (e.g., old thermometers).
30. Learn about alternatives to household cleaning items that do not use hazardous chemicals.

31. Buy the right amount of paint for the job.
32. Review labels of household cleaners you use. Consider alternatives like baking soda, scouring pads, water or a little more elbow grease.
33. When no good alternatives exist to a toxic item, find the least amount required for an effective, sanitary result.
34. If you have an older home, have paint in your home tested for lead. If you have lead-based paint, cover it with wall paper or other material instead of sanding it or burning it off.
35. Use traps instead of rat and mouse poisons and insect killers.
36. Have your home tested for radon.
37. Use cedar chips or aromatic herbs instead of mothballs.

In your yard

38. Avoid using leaf blowers and other dust-producing equipment.
39. Use an electric lawnmower instead of a gas-powered one.
40. Leave grass clippings on the yard—they decompose and return nutrients to the soil.
41. Use recycled wood chips as mulch to keep weeds down, retain moisture and prevent erosion.

42. Use only the required amount of fertilizer.
43. Minimize pesticide use.
44. Create a wildlife habitat in your yard.
45. Water grass early in the morning.
46. Rent or borrow items like ladders, chain saws, party decorations and others that are seldom used.
47. Take actions that use non-hazardous components (e.g., to ward off pests, plant marigolds in a garden instead of using pesticide).
48. Put leaves in a compost heap instead of burning them or throwing them away. Yard debris too large for your compost bin should be taken to a yard-debris recycler.

In your office

49. Copy and print on both sides of paper.
50. Reuse items like envelopes, folders and paper clips.
51. Use mailer sheets for interoffice mail instead of an envelope.
52. Set up a bulletin board for memos instead of sending a copy to each employee.
53. Use e-mail instead of paper correspondence.
54. Use recycled paper.
55. Use discarded paper for scrap paper.
56. Encourage your school and/or company to print documents with soy-based inks, which are less toxic.
57. Use a ceramic coffee mug instead of a disposable cup.
